DaHe Heating

采暖省一半 大赫是典范

球墨铸铁热力管核心竞争力表现在以下几个方面

使用寿命长

同等使用环境下,球墨铸铁管耐腐蚀性能是碳钢管 2 倍以上,且球墨铸铁管采用耐高温减阻内涂层加强防腐,设计使用寿命为 50 年;

接口安全性能高

球墨铸铁管采用柔性承插连接,接口允许一定偏转,适应地基不均匀沉降能力强,接口承压能力大于管身,热力管道所有口径允许工作压力均在 2.5MPa 以上;

实施速度快

承插连接无须焊接,安装简便速度快,受环境影响小,是钢管安装速度的 5-10 倍;

管线自补偿

每个承插接口留有 2-3cm 安装间隙,补偿热伸长,实现管线自补偿,消除管道二次应力,免设补偿器,提高管网稳定性;

运行费用低

球墨铸铁管采用耐高温减阻内涂层,大大降低内壁粗糙度,有效降低运行电耗,且相同口径内径大,有效输水面积大于钢管,提高供热面积;

欢迎各位莅临 2025 年 ISH China & CIHE – 中国国际供热通风空调、卫浴及舒适家居系统展览会（中国供热展）。目前全球建筑、暖通、能源领域正在追求绿色转型，同时中国也推出一系列政策，鼓励建筑和市政基础设施的更新，并促进了暖通行业的技术创新与可持续发展。本届中国供热展紧随市场环境变化，洞悉复杂且独特的应用场景所带来的挑战，聚焦多元化的解决方案。

作为暖通、空调、热泵与舒适家居系统行业的年度盛会，中国供热展多年来深得业界同仁的赞许与认可，全球领军企业踊跃亮相，海内外资深专业人士积极参与。本届展会继续为参展商提供重要的展示平台，整体展览面积达 102,000 平方米，逾 1,030 家优质企业参展，展示涵盖“供热解决方案”、“能源解决方案”、“水路解决方案”、“舒适家居解决方案”和“智能与安装技术”五大领域的产品，以探索创新解决方案，应对行业不断变化的需求。

展会期间还将举行超过 60 场探讨供应链、招标、拓展海外市场的同期活动，助力企业紧贴行业发展趋势。这些活动细分为高峰论坛、综合解决方案、市场活动及奖项评比四大类别，邀请来自政府部门、行业协会及领先企业的代表，共同探讨零碳供热、城市更新、工业供热、储能方案和减碳策略等重要议题。

值得一提的是，中国供热展与中国城镇供热协会携手推出全新中国国际零碳供热高峰论坛，共同探索更多低碳能源供热技术路径。而亮点活动，2025 年中国国际暖通高峰论坛（iHVAC）将再次回归，与多位国内外暖通行业专家深入分析行业的前沿技术趋势，系列活动包括《2024 年中国热泵产业发展年鉴》发布会和工商业供热发展论坛。

因应近年热泵行业高速增长，本届展会特别联同中国节能协会热泵专业委员会，设立“中国供热展热泵创新产品奖”评比活动，嘉许一众优秀的热泵企业。展会也希望借此机会，助力行业的高质量发展，提升参与品牌的知名度，同时树立行业标杆。

最后，我们衷心感谢展会的联合主办方中展智奥（北京）国际展览有限公司对我们长期以来的协助与信任。同时，也感谢所有参展商、观众、合作单位及媒体多年来的参与及支持。

在此，祝愿大家在接下来的三天里享受愉快的展会体验，与潜在客户和合作伙伴建立联系，探索创新思路，共同打造行业未来的解决方案，并获得丰硕的收获。

Welcome to ISH China & CIHE 2025 - China International Exhibition for Heating, Ventilation, Air Conditioning, Sanitary Ware and Home Comfort System. The building, HVAC and energy sectors are undergoing a global transition towards greater environmental sustainability. A series of policies in China support this initiative by encouraging the renewal of buildings and municipal infrastructure, promoting technological innovation and green development in the HVAC industry. The 2025 fair has been adapted to reflect the recently evolving market environment, with a focus on delivering diverse solutions that address the demands of increasingly complex product applications.

ISH China & CIHE is an annual fair serving the HVAC industry that has been recognised by industry colleagues for decades. The fair attracts global leading companies and is further enriched by the contribution of experienced professionals from both domestic and international markets. Spanning an impressive 102,000 sqm and featuring over 1,030 prominent companies, the 2025 edition will provide a valuable opportunity for companies to present their products. The exhibits are grouped into five sectors: "Heating solutions", "Energy solutions", "Water solutions", "Comfort solutions" and "Installation & intelligence". Each sector provides extensive coverage of innovative solutions tailored to current and future industry needs.

During the exhibition, over 60 prestigious concurrent events are scheduled to take place on topics such as optimising supply chains, competitive bidding and expanding into international markets for export growth. These events cover four sections: interactive forums, solutions seminars, marketing sessions and industry awards, all designed to drive innovation and competitiveness in the HVAC industry, and solidify companies' relevance in today's market. The show aims to facilitate discussions of critical topics, including zero carbon heating, urban renewal, industrial heating, energy storage solutions, and carbon reduction strategies, with government representatives, industry experts, and leading companies in attendance.

Notably, ISH China & CIHE and the China District Heating Association are collaborating to launch the new China International Zero Carbon Heating Congress, which will be a joint effort to explore more approaches to low-carbon energy heating technology. The signature event, China International HVAC Congress (iHVAC) 2025 is returning to the fair, connecting experts from China and other countries around the world to explore the latest technological advancements. Several activities are planned, including the launch of the China Heat Pump Industry Development Yearbook 2024 as well as the Industrial and Commercial Heating Development Forum.

The heat pump sector has seen significant growth in recent years, prompting ISH China & CIHE 2025 to collaborate with the Heat Pump Professional Committee of the China Energy Conservation Association to establish the "ISH China & CIHE Innovative Heat Pump Product Award". This awards programme represents the acknowledgement of the leading companies in the sector, contributing to the advancement of the industry, enhancing brand visibility, while establishing new standards leading to greater innovation and collaboration.

This fair would not have been possible without the support of our esteemed co-organiser, CIEC GL events (Beijing) International Exhibition Co Ltd. We would also like to thank all the exhibitors, visitors, partners and media for their continued participation and support.

I hope you enjoy the fair and gain valuable insights over the next three days. Take the opportunity to network with potential new partners, explore innovative ideas and witness future-oriented technology that will be pivotal in shaping the future of our industry.

Dear guests and colleagues:

In this wonderful season of revival, we are getting together here to witness the grand gathering of the HVAC and smart heating industries. Here, on behalf of the organizers of the ISH China & CIHE 2025, I'm extending warm welcome and heartfelt gratitude to all of you!

The past year is a year full of challenges and opportunities. In the context of the global energy transition and "dual carbon" objectives, the HVAC industries are experiencing unprecedented changes. Green-carbon, green and smart heating, as an important engine behind the high-quality development of the industries, are guiding the industries towards a greener, more low-carbon, efficient and intelligent future with its greatest vitality and promising prospects.

ISH China & CIHE has been well praised and recognized by industry colleagues for years, and this session will focus on various solutions to create five segments of "heating solutions", "energy solutions", "waterway solutions", "home comfort solutions" and "intelligent and installation technologies" like never before. During the exhibition, we will work with partners across the industry chain to organize over 50 specialized events and competitions and over 100 specialized meetings. It's believed that this exhibition will help further industry exchanges and cooperation, jointly explore the industry trends, join hands to promote the innovation and application of HVAC and smart heating technologies, and ultimately contribute to construction of a clean, low-carbon, green, safe and energy-efficient energy system.

Looking into the future, we are fully confident. Let's work together and lead the future with intelligence, and write a new chapter for the development of HVAC and smart heating industries together with a more open mindset and more pragmatic work style!

Last, wish this exhibition a complete success!

对流式电采暖器在使用时, 机器底部网格进气口可以将空气自然吸入机体内部, 气流经过“米”形发热核心使冷空气转换为热空气, 由机器上方百叶窗口缓慢吹出循环于室内。整个机体没有采用类似风扇的设计, 但是站在机器前依然可以感受到从机体内部吹出来的热气, 运作时没有有噪音, 不会有干燥的感觉, 效果接近地暖。
When using a convective electric heater, the grid inlet at the bottom of the machine can naturally suck air into the interior of the body. The airflow passes through the meter; shaped heating core to convert cold air into hot air, which is slowly blown out and circulated indoors through the louvers above the machine. The entire body does not adopt a fan like design, but standing in front of the machine can still feel the hot air blowing out from the inside of the body, there is no noise during operation, there is no dry feeling, and the effect is similar to floor heating.

二联供、五恒系统的安装配套材料品类庞杂、规格多样，如果从业者在安装材料选择方面认知不足，那么会导致安装材料使用不合理、工艺处理不合规等问题频发。行业工具书《暖通宝典》应运而生，它就像一个知识库，重点围绕系统安装展开。书中对系统安装工具的选择、配套材料的选用、技术安装的要点、主机选型的方法等内容进行了全面深入地剖析，对于施工人员在现场遇到的问题，也都提供了相应的解决方案。此外，还包含新产品新技术的分享内容。它展示了二联供、五恒系统安装规范，能够规范从业者对于安装和选材的操作，使之更具合理性，是对行业进行全面知识普及的实用工具书。

对于厂家而言，这本书是绝佳的宣传窗口；对于熟悉技术的材料批发商，它能让其明晰市场所需产品；对于暖通公司，它有助于其挑选合适的安装材料，清楚了解材料的规格型号、功能用途，提升设计质量与安装工艺水平，让设计更好地落地实施。
